times the pigeon-houses are painted with simple white designs. This is done, so I was told in one or two villages, because the birds like it, and it draws them back to their own houses! Pigeons are kept chiefly for the sake of the dung, which is considered to be a valuable fertilizer for the fields. Probably, however, more harm than good is done to the crops by the breeding of these birds, for they accumulate in large flocks when the corn is ripening, and are with difficulty dispersed by men and boys armed with slings and stones.

FIG. 6. A VILLAGE HOUSE OF THE BETTER SORT

The houses of the peasants, in many cases mere hovels, are made of crude bricks, sometimes covered over with mud plastering. In the better houses (see Fig. 6) there is generally a flight of steps leading to an upper story, where there may be a sitting-room (*mandareh*), furnished with benches (called *dikak*, singular *dikkeh*), which are covered with rugs and supplied with cushions. The room in which the foodstuffs are kept is also usually in this upper story. The flat roof (Fig. 7) is a pleasant place on which to sit and watch the life in the streets below; it also serves as a hen-run, dog- and cat-run, a drying-ground, and is put to other utilitarian purposes. Here, for example, are stored huge bundles of sticks and dry maize-stalks (called *būṣ*), together with quantities of cakes of cow- and buffalo-dung, neatly stacked in rows, which are used

THE FELLĀḤĪN OF UPPER EGYPT

Shops of different kinds are situated in the wider streets or lanes, with open fronts which can be closed with wooden shutters when the owners are away (Fig. 11). Through the open shop-fronts the tailors are to be seen making *ǧalālīb* (long blouses; singular, *gallabīyeh*) for their customers, and in some villages one may watch the coppersmiths manufacturing bowls and jars. The vessels are hammered into shape over iron bars fixed in the ground. The iron bar is bent over at a right angle at the top, and flattened out so as to form a kind of anvil, on which the bowl or other vessel is beaten into shape.

FIG. 11. A VILLAGE STREET WITH SHOPS AND BUTCHERS' BOOTHS

Benches of bricks and mud (*maṣāṭib*, singular *maṣṭabeh*) are found outside some of the houses, and on them is usually to be seen a collection of children, fowls, goats, and even sheep, in happy promiscuity. Or perhaps a *maṣṭabeh* may be occupied solely by an old man, spinning wool, or holding a rosary in his hand and slowly passing the beads between his fingers and thumb (Fig. 12).

During harvest-time the swishing of the sticks as men and women beat the grain from the bundles of corn which they have received as wages for work in the fields,[1] resounds along the village streets.

The Yūsuf Canal (Figs. 4 and 13) flows past a village in which I have frequently resided, and there is a good deal of folklore connected with it. The water is believed to possess curative properties

BIRTH AND CHILDHOOD

If a midwife is called in to assist at a birth she brings with her the customary confinement chair (Fig. 28); for women in Egypt give birth in a squatting attitude. If this professional assistance is not required the woman squats without the chair, resting her arms on, and pressing upon, a sieve which stands on its side (Fig. 29). She leans forward on the sieve even if she squats on the chair. The sieve, which is a large one such as is employed in winnowing, plays quite an important part in all the birth ceremonies, as will be seen later.

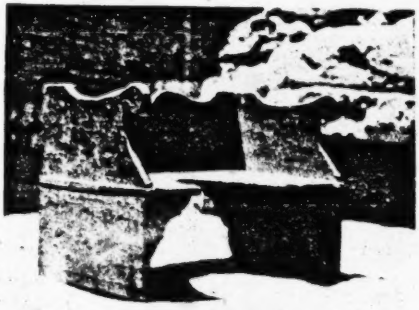

FIG. 28. CONFINEMENT CHAIR

It is the business of the female attendant or midwife, as the case may be, to cut the umbilical cord. The afterbirth is dealt with in a variety of ways. In many parts, if not all over Egypt, it is often called *el-walad et-tāni* (the other, or second, child), and some people regard it as an unfinished infant. If a woman is anxious to make sure of having another child she buries the placenta of the latest-born under the threshold of her house. She does this in order that when she desires to have another child she may be able to step over the buried placenta three, five, or seven times; for the belief is that its spirit will then re-enter her body, to be born again as a complete child in due course.

FIG. 29. WOMAN LEANING ON SIEVE

If a woman has lost several children in succession at birth she

nails or fastenings of any kind are used. The lid is made in a similar way. I always have my kitchen utensils and stores packed in such baskets when travelling from village to village, as they have the advantage of being light in weight as well as durable.

Beds, chairs, and small tables are made of the same material and in a similar way to the *ḳafaṣ*.

Native rope is usually made out of the fibre of the palm-trunk (*līf*). The *līf* is picked over and torn into strips, which are twisted into a cord between the palms of the hands (Fig. 91 and Frontispiece). There is a large rope-making industry in Fayūm Province, and the ropes made in this village are traded over a large area.

goods for sale pays a small sum to the owner of the property on which the market is held.

There is no more animated scene than a village market (Fig. 95). Some of the traders bring their goods the evening before, packed in *akfâṣ* (plural of *kafaṣ*) and other receptacles, and these, together with bundles of sugar-cane and the like, are deposited overnight in the market-place, being left in the charge of village guards. Others who have goods for sale begin to assemble very early in the morning, bringing sacks of onions, bundles of cotton cloths, cheap jewellery, household and kitchen utensils, tomatoes and other vegetables, as well as cattle, sheep, goats, donkeys, and camels. The butchers are usually among the first to arrive, for they slaughter the animals on the spot, hanging up the carcasses on huge wooden tripods (Fig. 95, and p. 32, Fig. 11). While thus suspended the meat is cut up, and the purchaser is able to select any special portion that he or she requires.

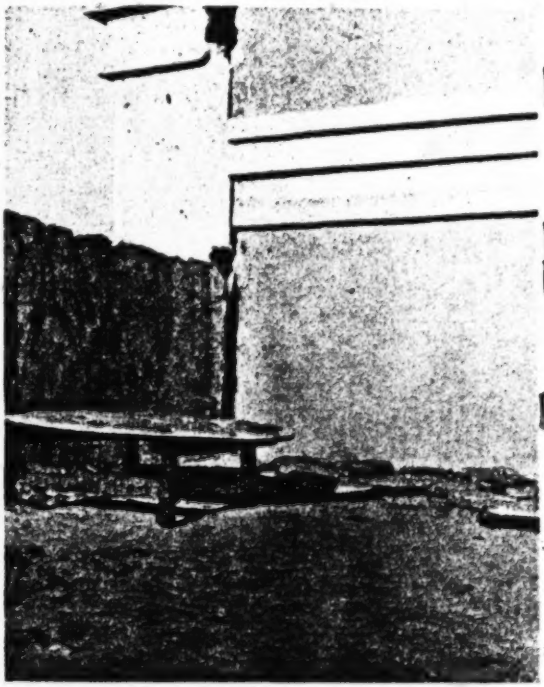

FIG. 94. LOAVES OF UNBAKED BREAD PUT IN THE SUN TO RISE

Each trade has its own particular location in the market-place, which is thus divided up into sections, such as the market of camels, the market of meat, the market of sugar-cane, and so on. Women take their full share in the business of selling, and may be

sightseers. The floor and the walls of the room were of mud, but a fairly clean mat was secured for me to sit on, the magician and her patient squatting close by me. The former took the kerchief from off her patient's head, folded it cornerwise, and measured it from corner to corner with the span of her hand. She then knotted it and sat on it. Suddenly her whole body began to shake violently, and she uttered curious noises. This indicated that the sheikh was assisting her and making his presence felt. Her face now underwent a remarkable change of expression, and her voice, attitude, and whole behaviour became distinctly masculine, and everybody present addressed her as the Sheikh Muḥammed. She told her patient that she was to visit a certain sheikh's well, which was situated some miles away from her village. The sick woman asked if she might not go to the well of a sheikh in the magician's own village, but this request was peremptorily refused. It was, she said, necessary that the well mentioned before should be visited. This event happened during Ramaḍān, the month of the Muslim fast, and the magician told the woman that she was to come to see her again on the day of the 'Little Festival' (which immediately follows Ramaḍān) and that then she would give her a charm to wear.

The magician kept up her manly impersonation even after the *séance* was over, and she presently declared, much to the joy and amusement of the villagers, that she had fallen in love with me and wished to marry me! This ridiculous speech was believed to come from the Sheikh Muḥammed who possessed her and whom she impersonated, at any rate for the time being. She would not be satisfied until I consented to be photographed with her!

Another female magician of my acquaintance (Fig. 114) is also somewhat renowned within her village circle. This woman's husband is dead, and she lives with two of her sons. One room in their house is set aside for her use only; no one else must ever enter it, except the people from beneath the earth, with whom she is supposed to be in close and intimate relationship, and for whom there is always a supply of food and a *ḳulleh* full of water in her room. When she takes a meal she does so in this apartment, and she will not eat with other people. She has five familiars who live beneath the earth, and through them she gets into touch with the other subterranean supernatural beings, including *'afārīt*. One of these familiars is called Zedimāl; another, a son of Zedimāl, is called

787 685 to the direction in which it turned, either to the right or left, the man whose name was inscribed on the piece of paper selected was guilty or not guilty. Several of these strips of paper were tested, and two or three people whose names were written thereon were detected as the thieves. The man whose things had been stolen told me that he had all along suspected these people, but, as

[291] [342] [352]

FIG. 118. DIVINATION CEREMONY WITH THE ḲORĀN TO DETECT A THIEF

they were related to his family, he did not like to prosecute them. [152] They were the poorer members of the family, and were consequently very jealous of their richer relative. The magician employed on this occasion is renowned for his cleverness in such methods of divination, and no one would dream of doubting his decisions.

754 There is a form of black magic still practised in Egypt by means of human figures made of wax or clay. If a man desires to take his revenge on another who, he considers, has done him a grievous wrong he visits a magician and gets him to make a wax or clay

ANCIENT EGYPTIAN ANALOGIES

FA 342 565

The poorer classes lived in tumbledown dwellings similar to those in which they live at the present time, as can be seen from the clay models of such houses dating from the Herakleopolitan Period (*c.* 2445–2160 B.C.).[1] Houses exactly like those of the respectable but not well-to-do *fellāḥīn* have recently been found at el-ʿAmarneh.[2]

The portico, so marked a feature of the better type of modern

THE FELLĀḤÎN OF UPPER EGYPT

or village.[1] Doubtless, too, the ancient craftsmen were to be seen at work in the open shops as are their descendants to-day; and here it is to be noted that a support, somewhat resembling that upon which the modern coppersmith rests his vessel in order to hammer it into shape (p. 32), is depicted in numerous New Kingdom paintings of metal-workers plying their tasks[2] (Fig. 155).

I have spoken (p. 23) of the light-heartedness of the modern Egyptians. This, as my brother has pointed out to me, was an

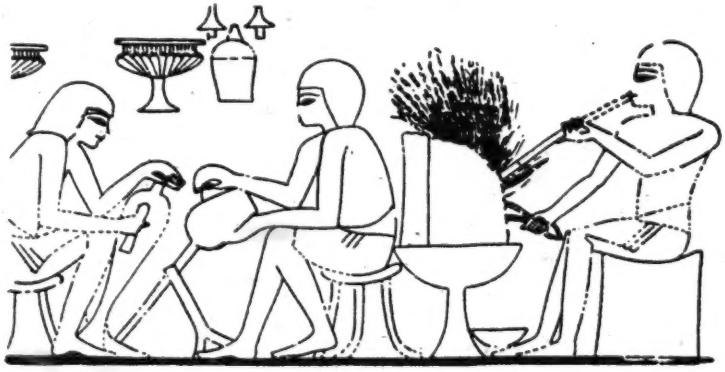

FIG. 155. ANCIENT METAL-WORKERS
After Nina de Garis Davies, *The Tomb of Two Sculptors at Thebes*, Pl. XI.

outstanding trait in the character of the ancient Egyptians, as is well exemplified not only in their literature,[3] but in the paintings and sculptures which adorn the tomb-chapels of the wealthy, and which depict feasting, sport,[4] pastimes, and daily life in general. The Egyptians devoted all this labour and expenditure to the construction and decoration of their Houses of Eternity not because they were always morbidly brooding over death, but because they hated death and loved life and all that life stands for.[5]

I have pointed out on pp. 38 f. that it is to her brother that a

[5] On this subject see especially A. H. Gardiner, "Life and Death (Egyptian)," in Hastings, *Encyclopædia of Religion and Ethics*, vol. viii, pp. 19 ff.

I go visiting my parishioners", says Mgr Khouzam, Bishop of Thebes, "I find few houses with doors. They have square holes for entrances, and these are the only openings. The sole furniture is an oven for bread, a jar of water, a cooking pot and a bowl. In a few houses there is a cord stretched across a corner from wall to wall. This is the wardrobe, where spare clothes are hung. The roof is so low as to be oppressive".

Fortunately, houses normally have two, if not three, rooms. (") Apart from slight variations in plan, size and arrangement, these usually comprise:

1. A hall (*mandara*). Against the right-hand wall is built a long raised seat (*mastaba*). As the outside door opens into it, this is the best-lighted room in the house. It is used for visitors and guests.

2. Opening into this is the combined sleeping-room and kitchen. In a corner is the oven, built of bricks and set against the wall. Its flat top forms a kind of bed, on which two people sleep in winter. There is no chimney. The smoke escapes by the loophole in the wall.

3. Further in still is a little yard (*zariba*) about six foot wide and partly covered with maize thatch. This serves as a stable for the *gamoossa* and the donkey, but can be approached only through the front door.

The distinction is not very rigid, and there is nothing to prevent the sitting-room from serving as a stable, or the yard as summer sleeping-quarters. The fowls live everywhere; the pigeons nest in niches in the outer wall, or in petrol tins piled together. In villages where there is a Coptic majority, the pigs must also be taken into account; the Christian fellaheen rear these, not for themselves, but for European pork-butchers. As often as not, we must add that friend of the fellah and guardian of his goods, his shaggy night-howling dog.

The floor of the house is of beaten earth. The furniture is heaped up in disorder in the corners. For meals there is a Primus stove, one or two copper cooking-pots, and a low round table of white wood about three feet wide and eighteen inches high. For sleeping there are straw mats, a few cotton coverlets, or perhaps only a big sack. Sometimes there are beds constructed of palm branches (in the same way as chicken coops) and perhaps a cotton-stuffed mattress. For household

352 and toilet use there is a large flat tub (*tisht*) which serves
353 as both laundry-basin and bath, a fragment of mirror, and
296 a big wooden chest which may hold almost anything. This
515 was a gift at the betrothal, and its crude colours are reminders of a red-letter day. "In this chest near the oven, whose key the mistress of the house wears at her neck, I have seen all jumbled together eggs, pepper, cheese, rags, needles and thread, several necklaces and a packet of *kohl*." This from the letter of a surprised French missionary.

181 The close proximity of men, cattle and soil is as noticeable
356 in the fellah's house as in the field and the village. It is a reflection of the fellah's social level and manner of life. Like house, like household.

The fellah's dependence on soil, sun and water extends even to his house. He himself is of the earth, earthy, through his labour and his food, in his diseases and finally in his death. His house no less, by the material of which it is made — floor, walls, roof and all — and by its very squatness is a part of the earth.

342 The fellah lives out of doors because of the lack of
362 comfort in his home, which is no more than an unfurnished
181 sleeping-place and a store-room, a part of the crowded camp
183 which is the village.

All the houses are alike. The fellaheen have little individuality; each is an atomised unit of the mass, and his household but one cell in the agricultural hive. At the same time there is little or no space reserved for agricultural uses. The fellah works for others, and does not store the produce of the land for himself.

Yet this dwelling, which lacks so much that we deem essential, is so well adapted to its tenants and their habits that they will change or rather deform into its likeness any better-appointed house built for them on a model *'ezba*.

342 A house on an *'ezba* belongs to the owner, one in the
421 village to the fellah. House and site together are worth at the most L.E. 25. There is no rent or house tax to pay. On an *'ezba* the dwelling enters into the conditions of lease or share-tenancy. In the village it belongs to the head of the family.

592 In this homestead scarcely larger than himself the fellah leads a life of his own, no longer as a serf but as a master. Each house contains a large family, including very often, besides the father and mother, four or five children, a grand-

The wedding procession

the *Kūdīya* demands anything, can she contradict her, lest the Grand *Shaikh*, under whose jurisdiction the demons [or *'Afārīt*] are, may be angry. And so the woman comes to her husband with bashfulness or with abuse, and if she is able to wheedle anything from him she does so. If not, she must sell something of her own property, and put a stop to the demands of the *Kūdīya*, somehow or other. If she should demand of one of them the performance of the *Zār*, the expenditure will not fall short of twenty or thirty guineas, not to mention trinkets, ornaments, and valuable garments which the *Kūdīya* asks from her, with the statement that the *'Afrīt* [or demon] has come to her in a vision and demanded of her such and such. So the woman is compelled to yield to the demand for fear that he will cross her and cast her into sickness."

"Now I shall explain to my gentle readers what I have actually seen myself [p. 74]. On one occasion one of my lady friends invited me to visit her on a particular day because she would perform the *Zār*, and I was most anxious to witness it. I had never seen it, though I had heard about it. When I entered the place I found a wide court spread with a large carpet, and along its sides rugs thrown upon the ground, so that no part was above the other. This was out of respect for the *Kūdīyāt*, who do not like to sit on couches, nor may anyone sit above them. This is done out of obedience to "Religion," seeing that their belief is that what they do is in accordance with the text of the Divine Law, which just shows the ignorance of these women and their not studying the facts, for they know nothing of their Religion except the names of Saints like *Bedawī*, *Rifā'ī*, *Bayūmī*, *Mutawellī*, and other such names.[1] So if one of them has the least ailment, the *Kūdīya* makes her imagine that *Sīdī Bedawī* or some other will come to her. And everyone knows how much the imagination influences the feelings. So the women seek "blessing" from her, and come to her from all sides, reckoning the honouring of her one of the chief requirements of religion, because there dwells in her body the pure *Sīdī Bedawī*, or *Shaikh Muḥammad*, or

[1] [*Bedawī* is the celebrated saint of Ṭanṭā, in the Delta; *Rifā'ī* is buried in Cairo near the Citadel. *Bayūmī* is buried at Ḥuseinīya near 'Abbāsīya, Cairo; *Mutawellī* is the famous *Ḳuṭb* (or "*Pole*") of the *Ṣūfīs* and is supposed to manifest his presence behind the *Bāb al-Zuwaila* in Cairo. Tr.]
